Real Colors®

Real Colors Virtual Instrument + In-Person Workshop

When a participant completes the Real Colors Virtual Instrument, they do not receive their Color Spectrum scores. Participants receive the date of their upcoming workshop, their facilitator contact, and a note stating they will receive their scores and discuss the meaning of the colors in their upcoming Real Colors workshop.

All participant scoring is sent directly to the facilitator. The facilitator has access to a PDF document for each participant showing the participant's Color Spectrum. At the close of the Real Colors workshop, the facilitator will release the participants' scores to them. Then, when a participant logs into realcolors.org, he or she will see his or her Color Spectrum and have electronic access to the resources from the back of the Real Colors paper instrument.

This is a purposeful choice which allows the facilitator(s) to know participants' colors and scores. This allows them to pre-establish the Primary Color groups, identify the reality check, and plan if they are missing a color from a particular workshop.

For the follow up in-person workshop, facilitators will basically follow the Certification Handbook. The schedule is approximately 160 minutes but can vary depending on workshop size, facilitator familiarity with presenting Real Colors, time spent in each section, and other variables. Thus, a 2.5 hour workshop is doable if one is very expeditious, but 3 hours seems optimal and allows for more breathing room.

CONTENT	APPROXIMATE TIME	NOTES
Introductions of self, participants, and Real Colors	5-7 minutes	This is the same as any foundational workshop. • Who are you? • Who are they? • What is this workshop about?
Conduct a short ice breaker. Would You Rather, page 29-30 in the Certification Handbook, works well because it allows for an immediate discussion of preferences.	13-15 minutes	It is important to get the participants moving, talking, and experiencing some fun! Additional activities are available in the Facilitator Resource Library.
History	10 minutes	A brief overview of the 5 people/topic areas to establish your credibility and answer "Why?" for any **GREENS** in the workshop.

Real Colors®

CONTENT	APPROXIMATE TIME	NOTES
Distribute each participant's Color Spectrum PDF or confirm everyone knows their Color Spectrum and corresponding scores.	1-2 minutes	This may have been accomplished prior to workshop. Just be certain everyone knows at least their primary color!
Explain the numbers. Cover: • Ties • 2 high/2 low • 3 close • Range (12-48) • 5-point variance	5 minutes	Refer to the Certification Handbook, your Master Facilitator, or the Resource Library on realcolors.org to refresh your memory.
Divide into Primary Color groups and give instructions for creation of their posters.	8-10 minutes	This should be fast since the color distribution for the workshop is pre-determined.
Brightening, to include poster creation and processing	Allow 20 minutes to create the posters. Allow 20+ minutes PER PRIMARY COLOR GROUP to discuss each paper.	While all of the above lays the groundwork, the Brightening completes the picture of each color. It is imperative to ensure ample time to adequately cover this crucial portion.
Closing, preferably an application-focused activity	Allow at least 15 minutes for a quick close. • Think of a famous person and hypothesize what their Primary (and Secondary for a challenge) Color might be. • Play 20 questions where the workshop participants try to determine the facilitator's Primary and Secondary Colors. If you have longer, do a deep dive into a specific topic, utilizing the content in the Resource Library or one of the activities from the back of the Certification Handbook.	The close is the icing on the cake, provides the "take-away", and answers the "what do I do with this new information and experience?" question. If using the "famous person" close, it is helpful to have some biographical knowledge or information. While we don't know the person's actual Color Spectrum, this exercise shows how to immediately apply Real Colors knowledge to ascertain the colors of another person, which can open the door to better communication.
